

Speed Limiter

“Improve Safety,
Reduce Costs...”

Based on the year-long experience in the development of fuel systems for industrial engines, IMPCO Technologies offers proven integrated speed limiter solutions dedicated to work in harsh industrial environments.

The IMPCO Speed Limiter is a cost effective automatic speed limiter for all kinds of industrial vehicles with either mechanical or electronic throttle. The system controls the vehicle's maximum speed whilst still allowing the operator to use the full power of the vehicle for functions other than driving, e.g. lifting or sweeping.

FEATURES & BENEFITS

- Suited for Drive by Cable & Drive by Wire applications (IC or electrically powered)
- No loss of engine power to guarantee hydraulic functions and driving torque
- Possibilities to program multiple max speed settings
- Available in 12V & 24V
- Easy to install
- Electromagnetic compatibility
- Reduced overshoot guarantees smooth drive
- No noticeable reaction on the gas pedal position
- Dedicated industrial kits available for a wide range of fork lift trucks and tow tractors

INCREASED SAFETY ON THE WORK FLOOR

IMPROVED FUEL EFFICIENCY

REDUCED WEAR OF ENGINE, TYRES AND BRAKES

Maximum speed settings are electronically programmed to our customers' requirements. In case of multiple speed settings the system can change to another maximum speed manually or automatically.

All IMPCO Speed Limiter kits are supplied as complete sets for a specific truck model.
